

My Favorite Songs

© 2008 Words & Music by Dan Rub

There's so many things I need to do
And there's so many things need
Getting' done
It's such a big world that I see
And there's so many fears to overcome

There's so many things I need to say
And only so many words under the sun
It's always so hard to find the time
And there's so many roads we have to run.

My favorite songs are fading fast
Echoing into an empty room
My favorite songs are fading fast
And so is the love I hold for you

There's so many people I have known
And there's so many places I've been to
Now the music that's playin' in my head
Means as much to me as I do you

My favorite songs are fading fast
And melting into the walls of blue
My favorite songs are fading fast
Words you never listened to

There's so many things I need to do
And there's do many things need
Getting' done
It's such a big world that I see
And my favorite songs need to be sung.
