

See You in the Dark

© 2008 Words & Music by Dan Rub

The light that shines within your eyes
Tells me that it's all right
The smile that's pressed upon your lips
I hope to taste within the night
I long to see you in the dark
I long to reach to you
And find out where you are

Just a couple thousand pages
And I'm on my knees
Just a couple thousand more to go
And twice as many teardrops
Left to leave
I long to see you in the dark
I long to be with you
And find out who you are

I wanna know you, wanna show you
Wanna go with you
To places we should be
I know that when I saw you
I could only call to you
And hope you'd come to me
I long to see you in the dark
I wanna reach to you
I wanna speak to you
I wanna find out who you are

The truth is here it's been so clear
I live and learn and turn to face
And in the end I won't rescind
What I defend to know as grace
I long to see you in the dark
I long to be with you
And know just who you are

I wanna know you, wanna show you
Wanna go with you
To places we should be
I know that when I saw you
I could only call to you
And hope you'd come to me
I long to see you in the dark
I wanna reach to you
I wanna be with you
And see exactly who you are
I long to see you in the dark
I long to see you in the dark
I long to see you in the dark
I long to see you in the dark
